

GUARANTEED RUST PREVENTION

11 POINT CHECK LIST

- Personnel should always wear gloves while handling metal parts during production, inspection and packaging.
- Metal parts should never come in direct contact with wood pallets, corrugated boxes, or untreated paper.
- Metal parts must remain covered with VCI paper and/or poly throughout the entire manufacturing process.
- Metal parts must be clean, dry and free of finger prints before packaging.
- Use a combination of both VCI paper and VCI poly for complete corrosion protection.
- Keep the VCI bag open until the metal parts inside reach ambient air temperature.
- Keep small metal particles "swarf" from contaminating your cleaning solutions and metalworking fluids and causing galvanic corrosion.
- Make sure all cleaning solutions and metalworking fluids maintain a pH of 9.0 or above for ferrous metal, and 7-7.5 for non-ferrous metal.
- Only use deionized or distilled water while cutting or in cleaning fluids.
- Keep metal parts away from industrial air contaminants such as exhaust from lift trucks, manufacturing and heat treat areas.
- Manufacturing and shipping areas should be temperature controlled and allow for no more than a 10 degree shift at any time.

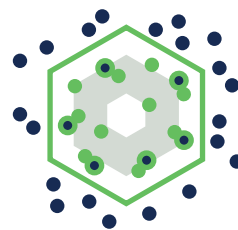

HOW VAPOR CORROSION INHIBITOR (VCI) TECHNOLOGY WORKS

VCI materials contain corrosion-inhibiting chemicals, which neutralize the air around your metal parts and protect them from rust and corrosion. Working on a molecular level, the technology migrates from the VCI material into the packaging environment to create a layer of protection that adheres to all areas of a metal's surface, including hard-to-reach interior areas.

Your Parts Wrapped with Other VCI Brands

Other VCI brands carry lower concentrated levels of VCI inhibitors leaving your parts vulnerable to rust and corrosion

Your Parts Protected by Rust Guard Premium™ VCI products

Rust Guard Premium™ VCI products contain the highest concentrated level of VCI on the market providing complete protection against rust and corrosion.

- Rust Guard Premium™ VCI
- Other VCI Brands
- Air Molecules
- VCI Inhibitor Molecules
- Air Molecules Neutralized by VCI Inhibitors

Call 855-466-7878 today to Take advantage of complimentary state-of-the-art accelerated corrosion testing in our lab.

End rust and corrosion. Guaranteed.
